lifting capacity each, were being used in repair work of the New Mole, on the side facing Cabotage harbor. Another crane, about half a ton lifting capacity, was used for repair work which was progressing at a very slow pace. There was a dredger in operation at the head of Voyenny Mole (see position 4 on sketch), and other repair work was being done at position 5. There is a refrigerated building approximately 60 x 12 x 20 meters, which is used for storage (see position 8). A refrigerated ship was unloading various food stuffs in front of the building. Near this ship there were two floating cranes of 40 or more tons lifting capacity. Along the base of Cabotage harbor there were ten electric cranes on tracks of five to ten tons lifting capacity each.

Pratique Harbor

6. The following vessels were observed in Pratique Harbor:

Two MTBs which had been pulled ashore;

A small floating dock, ~~NA~~¹⁹, approximately 30 meters long and 10 meters wide, with two naval auxiliary vessels on it. This floating dock can accommodate vessels up to approximately 1,500 tons (position 6 on sketch);

Two [KRONSTADT-class?] subchasers
a [SKORYY-class?] destroyer

50X1-HUM

Two submarines (positions 9 and 10).
upper part of their conning towers was covered with canvas;

The

Two other submarines, apparently newer than those
(see position 11);

Unidentified naval vessel, pendant number 379;

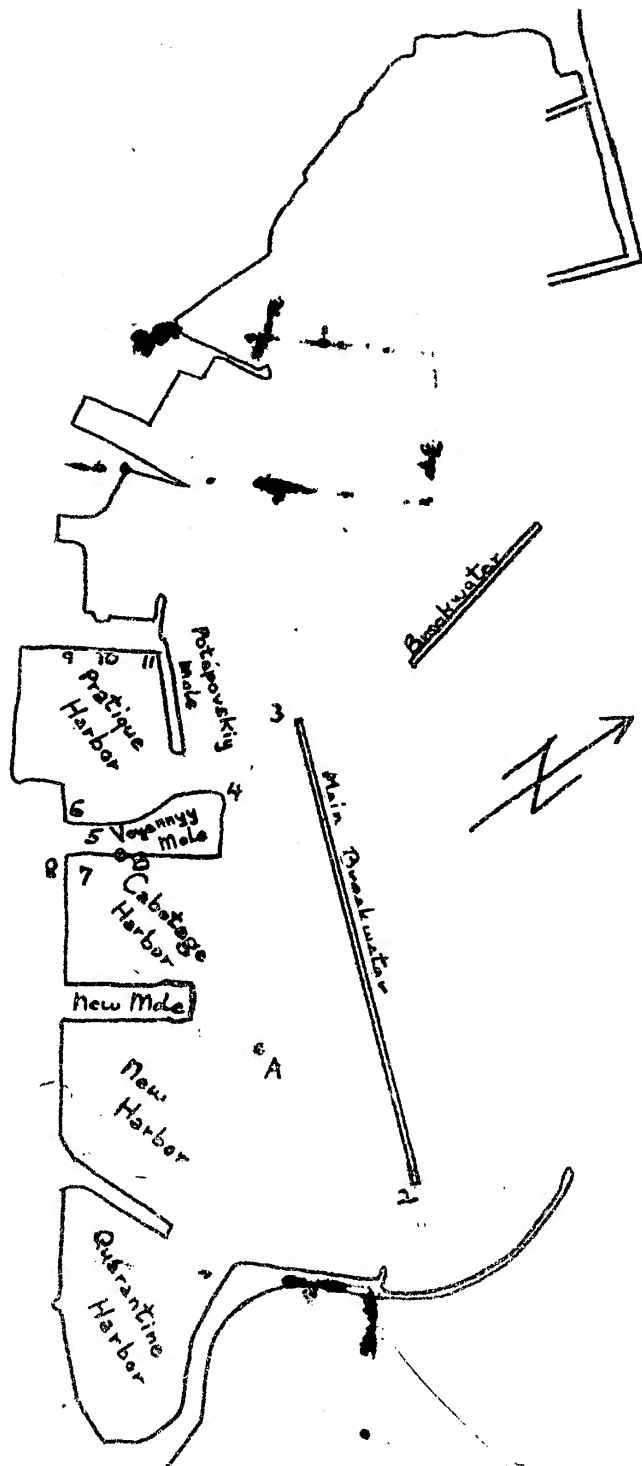

Two identical naval vessels, resembling submarine chasers
